Administration

Production for Week Ended:  
August 18, 1990

Export/Import  
Supplement

## Preface

The *Weekly Coal Production (WCP)* provides weekly estimates of U.S. coal production by State. Supplementary data are usually published monthly in two supplements: the Coal Exports and Imports Supplement and the Domestic Market Supplement. This week's Coal Exports and Imports Supplement contains detailed monthly data on U.S. coal and coke exports and imports. The Domestic Coal Market Supplement contains detailed monthly electric utility coal statistics, by Census Division and State, for generation, consumption, stocks, receipts, sulfur content, prices, and the origin and destination of coal shipments. This supplement also contains summary level, monthly data for all coal consuming sectors on a quarterly basis.

Preliminary coal production data are published quarterly based on production data collected using Form EIA-6, "Coal Distribution Report." The coal production estimation error for a quarter at the national level (i.e., the difference between the sum of the weekly estimates for a quarter and the quarterly EIA-6 preliminary data) ranges from 1 percent to 4 percent.

Final coal production data are published annually based on the EIA-7A coal production survey. The re-

vision error for a quarter at the national level (i.e., the difference between the EIA-6 preliminary data and the EIA-7A final data) ranges from .02 percent to .08 percent.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1988*, and *Coal Data: A Reference*.

This publication was prepared by Wayne M. Watson and Michelle D. Bowles under the direction of Mary K. Paull and Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202/586-8800).*

## Summary

U.S. coal production in the week ended August 18, 1990, as estimated by the Energy Information Administration, totaled 21 million short tons. This is about the same as production in the previous week and in the comparable week in 1989. Production East of the Mississippi River totaled 12 million short tons, and production West of the Mississippi River totaled 8 million short tons.

U.S. coal exports in June 1990 were 9 million short tons, which brought the total for the first 6 months of 1990 to 50 million short tons, relatively unchanged from the comparable period of 1989. The three principle destinations in the first half of 1990 were Japan, Italy, and Canada, each receiving approximately 6 million short tons. Together they accounted for 36 percent of the total coal exported. Compared with the first half of 1989, shipments to Japan and Canada were down by 18 and 13 percent, respectively, whereas shipments to Italy were relatively unchanged.

Metallurgical coal exports during the first 6 months of 1990 totaled 32 million short tons, a decline from 34 million short tons in the same period a year earlier. Japan was the leading importer of U.S. metallurgical coal in the first half of 1990, receiving 5 million short tons. However, this was 21 percent less than in the first half of 1989, due to replacement of U.S. metallurgical

coal by Australian coal. Other significant importers of U.S. metallurgical coal were Italy, Belgium and Luxembourg, France, and Brazil. Shipments to Canada dropped by almost 1 million short tons, while those to Romania rose by nearly a comparable amount.

Steam coal exports during the first 6 months of 1990 totaled 18 million short tons, 16 percent above those a year earlier. Canada was the leading destination, receiving 4 million short tons. Compared with the first half of 1989, the largest increases in steam coal shipments were to Taiwan, Belgium and Luxembourg, and France.

U.S. coal exports in the first 6 months of 1990 were valued at \$2.1 billion, based on an average price of \$42.84 per short ton. By far, the major coal-exporting port during the period was Norfolk, which loaded 26 million short tons, or 52 percent of the total coal shipped.

U.S. coal imports in June 1990 totaled 348,267 short tons. During the first 6 months of the year, coal imports rose 16 percent above the level a year earlier, due primarily to increased shipments from Colombia. Based on an average price of \$34.40 per short ton for the 6-month period, the imported coal was valued at \$48 million.

<sup>1</sup> Based on the U.S. - Canada Free Trade Agreement, as of January 1990 the U.S. Department of Commerce began reporting statistics on U.S. exports to Canada based on information on imports provided monthly by the Canadian government. For this reason the quantity for both coal and coke, coal type (metallurgical and steam), and value of both coal and coke are no longer strictly comparable to the historical U.S. series due to the additional time lag in reporting.

<sup>2</sup> Includes countries with exports less than or equal to 50,000 short tons in 1989.

Note. Total may not equal sum of components because of independent rounding.

<sup>1</sup> Based on the U.S. - Canada Free Trade Agreement, as of January 1990 the U.S. Department of Commerce began reporting statistics on U.S. exports to Canada based on information on imports provided monthly by the Canadian government. For this reason the quantity for both coal and coke, coal type (metallurgical and steam), and value of both coal and coke are no longer strictly comparable to the historical U.S. series due to the additional time lag in reporting.

<sup>2</sup> Includes countries with exports less than or equal to 50,000 short tons in 1989.

<sup>3</sup> Average price of all coal exports in this category.

(\*) Rounded to zero.

Note: Total may not equal sum of components because of independent rounding. Average price is based on the free alongside ship (f.a.s.) value. The average prices presented in this table are considered to be representative prices for coal exports and fall within the range of \$28 to \$50 inclusively.

<sup>1</sup> Based on the U.S. - Canada Free Trade Agreement, as of January 1990 the U.S. Department of Commerce began reporting statistics on U.S. exports to Canada based on information on imports provided monthly by the Canadian government. For this reason the quantity for both coal and coke, coal type (metallurgical and steam), and value of both coal and coke are no longer strictly comparable to the historical U.S. series due to the additional time lag in reporting.

<sup>2</sup> Includes countries with exports less than or equal to 50,000 short tons in 1989.

<sup>3</sup> Average price of all metallurgical coal exports

(\*) Rounded to zero

Note. Total may not equal sum of components because of independent rounding. Average price is based on the free alongside ship (f.a.s.) value. The average prices presented in this table are considered to be representative prices for coal exports and fall within the range of \$28 to \$50 inclusively.

# AFTER THE DECLARATION OF INDEPENDENCE OUR FOUNDING FATHERS WROTE SOMETHING EVEN MORE IMPORTANT.

Ten years after the signing of the Declaration of Independence our founding fathers created what historians have called the greatest single document struck off by the hand and mind of man.

Our founding fathers created the Constitution of the United States.

For the first time in history, power was granted by the people to the government, and not by the government to the people.

The freedom unleashed by the Constitution allowed Americans to develop their talents and abilities to the fullest. And attain what is now known the world over as the *American Dream*.

As we commemorate the Bicentennial of the Constitution, there is no better way for you as an American to reaffirm the principles for which our country stands than to learn more about the Constitution.

The words we live by.

## THE CONSTITUTION

The words we live by

To learn more about the Constitution write: Constitution, Washington, D.C. 20599. The Commission on the Bicentennial of The U.S. Constitution.
